

BlackBerry® Curve™ 8530 smartphone Wi-Fi® Set-up Aid

Make your coverage even bigger by using Wi-Fi to connect to your home or wireless networks or hotspots. In Wi-Fi coverage you can surf the net, send that presentation and snap and send a photo without getting off the phone.

To turn Wi-Fi on:

From the home screen, press the Menu key to access the full list of applications

- Click **Manage Connections** 
- Click **Wi-Fi**
- Press **Escape** to exit

To connect to a Wi-Fi network, complete the following steps:

- From the home screen, press the Menu key to access the full list of applications
- Click **Setup** 
- Click **Set Up Wi-Fi** 
- Click **Next**
- Choose one of the following options:

- **Scan for Networks** to scan for a network or hotspot
- **Manually Add Network**
- **Push Button Setup** if you are using a network access point enabled with Wi-Fi Protected Setup™

To scan for a network or connect to a hotspot, complete the following steps:

- Click **Scan For Networks**
- From the list of available Wi-Fi networks, click the appropriate Wi-Fi network
- Specify the required security credentials and click **Connect**
- Click **Next**
- Click **Wi-Fi Hotspot Login** to open the captive portal in the browser and specify the security credentials or payment options

- *Public and semi-public hotspots usually employ a captive portal for network security and do not require security credentials at this step in the process.*
- *The security credentials or payment options required by captive portals vary. Contact the network administrator for more information.*
